

Spelling Apps Guide KS2

Name Website/iPad App	Key features
 Squeebles spelling app	○ Customised Spelling Tests: parents and teachers can set up unlimited spelling tests for each player, with words suitable for that child. Tests can contain any number of words. ○ Pre-recorded Spelling Tests: downloadable pre-recorded KeyStageFun spelling tests suitable for 4-11 year olds in UK English. Squeebles ○ Great Reward System and Mini-Game: if they do well in their spellings, children can play a fun mini-game within the app called 'squeeberang' as well as stars to trade for squeeberangs (boomerang type things that are used in the squeeberang game). The balance between the spelling tests and this game means they have to keep doing well in their spellings if they want to progress on squeeberang. There are 100 squeeberangs to collect which can be used in the game, each with a different theme and 'costing' a different number of stars
 SpellFix	○ SpellFix Y3-Y6 Word Lists is a fun way of learning the spellings identified in the new National Curriculum for England. ○ Find the 8 spellings in each level using the clues and the available letters on screen. Use hints if you are stuck! The app is great for contextualised spelling development as the meaning of the word is taught at the same time as the spelling... and it's addictive! ○ Can you master the 30 progressively difficult level?
 Word Juice	○ Your task is simple: squeeze as much juice from the oranges as you can in three minutes. ○ To squeeze juice from an orange, you have to create words! Each orange is divided into 8 segments (three vowels and five consonants) AND a central vowel. Tap the letters to make a word, then tap 'GO' to squeeze the orange and start juicing! Each word must be three or more letters long and MUST include the central vowel. The longer the word, the more juice you'll make and if you use words with trickier letters, such as J, Q and Z, you'll make even more juice! If you make a mistake, tap the 'X' button to delete, one letter at a time, or hold the 'X' button to clear the whole word.

The Spelling Shed

- With three levels of game play, the app supports pupils of all abilities through the spelling lists with appropriate degrees of challenge.
- Dyslexia friendly
- Full coverage for Year 1-6
- Easy to use tools to create your own lists.

NB: all these apps are apps that need to be paid for to be used.
