

Knowledge Organiser: Worldwide Weather and Climate

This is a Geography based topic. We will identify seasons and weather patterns in the UK. We will locate hot and cold areas of the world in relation to the Equator and North / South Poles. We will also begin to understand different geographical terms and discuss how climate can affect vegetation.

Key Vocabulary

Soil

The top layer of earth in where plants go.

Soil

North Pole

The northern most point of the Earth.

North Pole

Equator

An imaginary line around the Earth that is of equal distance from the North Pole and South Pole.
